# Haynes Glass

We view every kiwi home as a special investment warranting attention to detail in all construction elements and finishings. It's more than just glazing to fit a purpose. It's about adding value.

Established in Howick in 1993, Haynes Glass is a full service glass, glazing and glass hardware company. Through innovation, hard work and dedication, we have grown into a glazing company capable of undertaking both small and large scale projects. We are proud to efficiently service the Greater Auckland region and beyond.

We handle all types of graphic, colour and printed style glass for new home builds, renovations and apartments.

## Glass **Splashbacks**

### *Why choose glass..*

Toughened glass is extremely easy to clean and is available in a huge range of colours, mirrored styles and prints. Glass splashbacks in a kitchen are toughened to ensure that they can withstand the heat from all types of cooktops.

## Colour **Glass**

Colour Glass is back-painted safety glass that can be made to any solid colour. You can be bold and make a statement. Match another colour in the room or choose a shade or colour that provides a bit of contrast. Combined with some smart modern lighting, colour glass will bring a real contemporary feel to your kitchen or bathroom.

## Printed Graphics

---

Any high resolution image, printed onto ultra clear toughened safety glass.

Our printer is a state of the art 1200x600 dpi UV ink printer and with a special pre-treatment we achieve perfect, permanent, GUARANTEED adhesion for 10 years. You can choose any kind of graphic or photograph to be transferred onto glass.

Options are endless but there are a few things to keep in mind when selecting your image. The shape of the glass for picture cropping, the colours and how they work in the kitchen, where the images focal point is relative to rangehoods etc. and the resolution of the image - We recommend at least 3000 x 4000 pixels at close to 300dpi (larger than a 4mb file).

## Mirrored Splashbacks

---

Mirrored glass splashbacks are a popular modern choice with a number of styles to choose from - silver, smokey grey, bronze or antique.

Mirrors are great for reflecting light, which will make a kitchen feel more spacious, open and bright. They're especially effective in small or dark kitchens, where they can transform an otherwise cramped space into a comfortable place for cooking, working and socialising. Having a splashback that reflects the garden or patio can even create the illusion of more outdoor space!

Mirrors are stylish and as they aren't a particular colour, they are a little more flexible with decor and the latest seasons trends.

## Printed **Textures**

---

*Faux marble, concrete and more..*

When printed onto glass, a printed high resolution texture takes on a premium appearance. All of the modern feel with the hygienic, easy to clean convenience and toughened resilience of glass.

All of the latest textures found in high spec homes.. Re-created on glass.

Come and visit our showroom to browse samples of the available textures

---

## Matte **Finishes**

---

Mirrors can be fit to the wall with domes, glued or on a stand-off mount. Why not add a really modern touch and install an LED backlight? Mirror demisters are also available with all mounting options.

## The **Process**

---

Contact us for a quote over the phone, via email, or to arrange to meet a consultant on site. If you haven't already chosen your colour (or design), our consultant will have some samples with him and is experienced to help you in the selection process.

On acceptance of a quote we will conduct a final measure. The glass is then cut to the accurate shape and measurements and toughened. Edges are polished and the glass is spray painted or printed. When it is dry we will call and arrange the install (installation generally takes 1-2 hours depending on the size of the job).

### Planning and Design

With a young creative team of reps and designers, we jump at the opportunity to go ultra modern and contemporary. We thrive on the new and love a challenge.

### 10 Year Guarantee

Our splashbacks are guaranteed for 10 years on paint / print delamination and workmanship.
